

WEBP3001
Assignment 3
2021

In assignment 2 you developed a web version of the MoH Trinidad and Tobago vaccination registration form. Client side verification was done using Java Script.

You are now required to include a submit button to pass the collected data to a web server and MySQL database.

The web server must generate a summary sheet of the information collected in a printable document format.

Submit in pdf format your code, screen shots of your database with sample data, summary sheet.
